DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group II in the reply filed on 11/15/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). However, because Applicants have changed their invention to compositions comprising a neurotrophic factor, the following lack of unity is necessitated. It is note that Applicants have cancelled all original claims 1-13.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group IIa, claim(s) 14-17, drawn to compositions comprising the neurotrophin, NGF.

Group IIb, claim(s) 14-17, drawn to compositions comprising the neurotrophin, BDNF.

Group IIc, claim(s) 14-17, drawn to compositions comprising the neurotrophin, NT-3.

Group IId, claim(s) 14-17, drawn to compositions comprising the neurotrophin, NT-4/5.

The inventions listed as Groups II a-d do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I was directed toward a method comprising the administration of anti-oxidants, which was not a contribution over the prior art, and therefore

Art Unit: 1649

was not a special technical feature. Applicants now claim distinct compositions comprising various neurotrophic factors, which are structurally different products, which do not share the same or a corresponding technical feature. Note that PCT Rule 13 does not provide for multiple products or methods within a single application. Because the technical feature of Group I is not a special technical feature, and because the technical features of the Group IIa-d inventions are not present in the Group I claims, unity of invention remains lacking.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Robert Hayes whose telephone number is (571) 272-0885. The examiner can normally be reached on Monday through Thursday from 9:00 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeff Stucker, can be reached on (571) 272-0911. The fax phone number for this Group is (571) 273-8300.
